

LYNBOND 2000

Supplier of Consumables for Cleanroom & Critical Environments

Cleanroom Swab – CA-002 HUBY Cotton Swab

The Huby CA-002 is round double-ended cotton swab consisting of high quality, long staple-length cotton, tightly wrapped and shaped on both ends of high strength, wound paper handles. Methylcellulose binder is used to secure the head to the handle and minimise shedding while maintaining low levels of extractable residue. The high-quality cotton fibres provide excellent particle entrapment and retention, as well as exceptional absorbency of most solvents and solutions. Recommended for absorbing to most common solvents including isopropyl alcohol, acetone, and is ideal for use with aqueous based solutions.

Key Attributes

- Round (Spherical) shaped double-ended cotton Swab
- Manufactured using long staple-length cotton, tightly wrapped and shaped on both ends and wound paper handle
- Free from silicon, amide and DOP
- Low non-volatile residue (NVRs)
- Low particles and ion content
- Excellent solvent-holding capacity
- Compatible with most common solvents
- No contamination adhesive or coatings

Application

- Micro-mechanical cleaning
- Remove contamination from disk drives
- Effectively clean small, hard to reach areas with solvents
- Remove flux residue, excess materials, debris
- Cleaning with compatible solution and solvents

Industries

- Semiconductor
- Microelectronics
- Optics
- Pharmaceuticals
- Medical Device
- Biologics

Material

- Swab head - Cotton
- Handle – Wound Paper
- Construction – Methyl-Cellulose binder

Head size

- Head width-4.4mm
- Head length-15mm

Handle size

- Handle width-2.4mm
- Handle length-73mm

Overall size

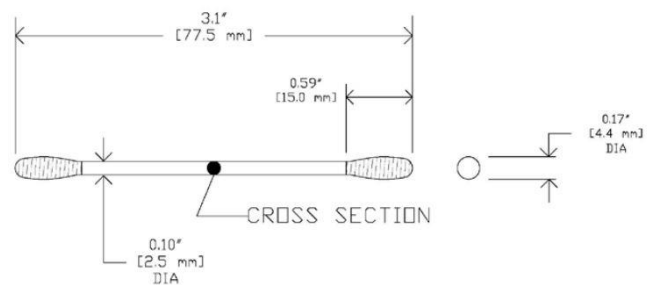

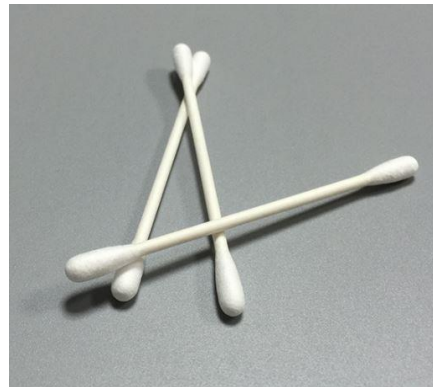

- Total length-77.5mm

Colour

- Swab head – White
- Handle – White

Quality Standards

- Manufactured in a facility holding ISO 9001:2008

Ordering Information

Product Code
CA-002

Swabs / Pack
25 Swabs / Pack, 100 packs / Case (2'500 pcs)
